# Ensuring optimum oxygen consumption with cutting-edge science

## Clinically-researched and tested to ensure detoxification at a cellular level

Believing that the wellness paradigm is actually about health and not the treatment of symptoms, SOE Air is based on the research by Jorg Klemm, around Singlet Oxygen Energy (SOE).

When excited from its stable, minimum energy, non-activated, non-reactive state, oxygen reaches the singlet configuration. It contains more energy than the oxygen we usually breathe.

SOE Air exposes a photosensitive catalyst to a light source that activates oxygen just how plants do while photosynthesis.

This way, oxygen changes from its basic triplet condition into an induced singlet condition releasing the SOE energy. It creates an atmosphere similar to the fresh air after a blizzard.

The released SOE energy is transmitted to the water molecules in the air.

The device then emits air rich with energy-filled water molecules which gets absorbed by the body matrix and directed to the locus of impact.

It makes singlet oxygen energy available for biological absorption.

This way, SOE Air produces this singlet oxygen energy to relax the lungs, allowing them to do their work more efficiently, and in turn, enabling the whole body to use the oxygen more effectively at a cellular level.

# How SOE Air will help elevate your business

Being portable, user-friendly, and light, SOE Air can be used in different settings of people's lives - while sleeping, working, or even at school. This is a fast selling personal wellness device for customers!

You can use it in your clinics and also sell it to your clients - to take home with them!
